Création de services

```
provider("monService", function() {
      return { ..., $get: function() { /* service */ } } };
service("monService", function() {
      /* constructeur */ });
factory("monService", function() {
      return { /* service */ } } );

    value("monService", { /* objet */ });

    constant("monService", { /* objet */ });
```
